SOILS REPORT REVIEW VERIFICATION FORM

DATE: _____

SUBDIVISION: _____

A soil investigation was conducted by _____
and labeled project # _____, dated _____

As the engineer of record for the above mentioned project, I have reviewed this soils report and have designed the
following foundation: _____

The foundation has been designed to an allowable soil bearing pressure of _____
at a depth of _____ below natural grade. This bearing pressure can be attained
provided the earthwork is accomplished in accordance with the recommendations of the soils engineer in the soils report.

The following are additional requirements or information regarding the soil conditions of this project:

Affix Seal (Hand Sign & Date)
